### KOME HEALTH CLUB

(Edited by Dr. David H. Reeder, Chicago.)

LASTICATION: Frequently I receive etters asking, "Why am I so thin although my appetite is good," or "Why am I so fleshy though I do not eat a great deal?" Several years ago I discussed that subject in a series of ar-ticles and pointed out that food in be properly assimilated order to should first be properly masticated. It is safe to state that as a rule food must be chewed until it becomes a Palace of the Press, it came to the liquid in the mouth and thus thoroughly incorporated with the saliva One of the foremost exponents of

"Do not take more than one-fourth to one-half teaspoonful of food into the mouth at one time, especially for the first week or two. In you take a larger amount of food you will have much more difficulty in learn-

ing Fletcherism.

Do not take any more food into the mou until this has been swallowed. thew the food industriously. Some Fletcherites take about two motions

of the jaws per second.
All particles of food should be broken up and reduced to a liquid or liquified form. Learn to return the food from the back part of the mouth James A. Farrell, President for further chewing before swallow the food until it loses its original taste. This does not mean that the food should lose its taste or flavor entirely, but it should be chewed until it loses its original taste.

Do not try to swallow at all, just

"The new company is one of the few, tion. If a piece of whole Gerbevillers and Sermaize in the state in which the Germans left them. Some photographs on glass can be used for lantern slides, and a lantern left to employ 2,000 male hands.

ator I took to the front on my con-able consideration on account of the science," said the captain who was greater opportunities for growth and about business or engage in conver-

choice.

The military and strategical department contains much that is shown only to a few privileged visitors of the allied nations. There are collected there the maps drawn of the enemy positions from photographs.

Comes here. One downtown man has procured four options on house property and others have been interested in gobbling up the real estate in that vicinity in the loope of building homes for the large number of men who will have to be housed if the concern poison toxins will be thrown off into to blood. Do not be afraid to wait a day of two longer if real to masticate your food properly. Do not eat when not really hungry. If you eat when not hungry the food will not be absorbed for the large number of men who will have to be housed if the concern poison toxins will be thrown off into to blood. Do not be afraid to wait "Mr. Farrell's name has been prom- a day of two longer if necessary for inently mentioned in connection with a good appetite. If you do not have his efforts that the company was in- juice when not really hungry at meal-

French army.

For the military floor of the Maison de la Presse the organizers have had an original idea. Beaumarchais said "A calculator was wanted and so a dancer jot the job." At the Maison de la Presse the right man is in the right thereby violate the principles of Flet-"If the new concern comes, it is a safe bet that Norwalk is due to become more or less of an automobile center. The coming of the Norwalk taste buds, causing an abnormal or unnatural appetite. Most people, eat entirely too much. Fletcherites often

you assimilate. When the food is reduced to a liquid in the mouth the work of the stomach is cut in two. When you be-come thoroughly accustomed to Fletcherizing you will require little or no more time for a meal than you formerly required when you bolted your food. Do not use your mouth as a funnel to deluge your stomach at

In drinking water at mealtime, do not take more than one-half teaspoonful at a time, retain this in the until the chill is taken off of it. Do not drink 6 or 8 glasses of water at one time. Do not drink much water for half an hour before meals or for an hour or two after meals.

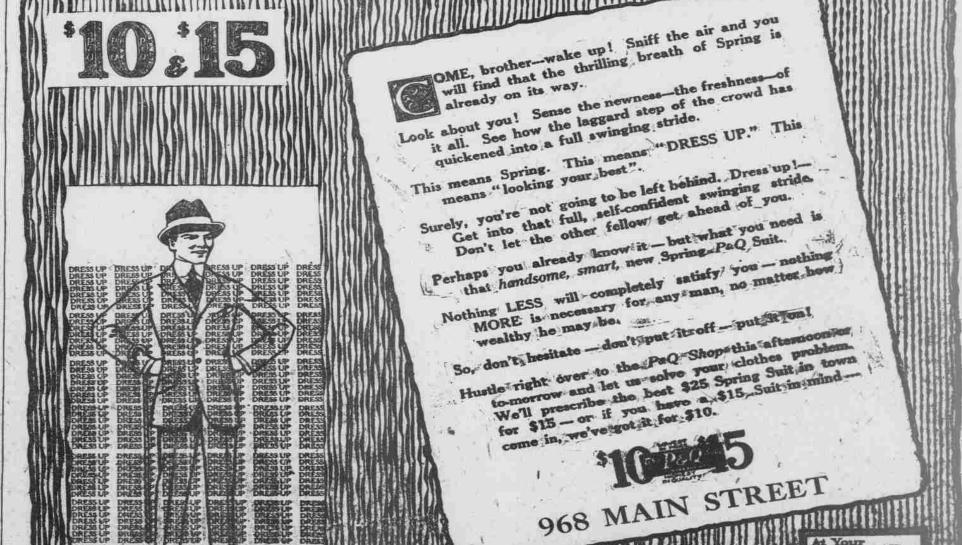

Be master of yourself, do not become a slave to wrong habits."

Personally I will add a few remarks to the above. Many fleshy readers will perhaps think that by Fletcherizing they will grow more fat, but the reverse will occur to these who are reverse will occur to those who are over-burdened with fleshiness. Obesity is a disease brought on by impro-per eating and this disease is cured by properly preparing the food for the stomach. At the same time those who are thin will find above methods ex-ceptionally beneficial and will great-ly help in increasing their weight to normal at the same time as tendency to indigestion, rheumatism and many other ill conditions will be reduced to
